

Good show, Michael! but there's
a lot "Moore" to the story

OK, So *Who* Done It? Do you Know these Clues?

- We have NO credible physical evidence of Arab hijackers on 9/11.
- Aluminum airplanes & kerosene won't pulverize buildings.
- No steel building has ever been seriously damaged by fire.
- Buildings WTC1, 2 and 7 all collapsed at free fall speed —
- just like a demolition — and WTC 7 had not even been damaged!
- The Pentagon invented "Planes as bombs" attacks in a 1993 study.
- That's the same year as the WTC truck bombing by FBI patsies.
- G. W. Bush's grandfather Prescott Bush financed Hitler —
- he gained power by the 9/11-like Reichstag Fire, on 2/27/1933.
- They would do it again to stay in power. How big is 911 squared?

Take the 9/11 IQ Test, at www.foneymoney.com

Oh, did your stove melt the pot
when it got hot? Certainly not!
It has to get a lot hotter.
F° 9/11 is just the tip of the tale.
